Your ability to work efficiently with your Timer is key in hosting a successful event.

RunSignUp makes the collaboration between Timer & Race Director easier:

RunSignUp is integrated with the Timing Software your Timer has been using forever.

Increased online registrations (vs paper) improves accuracy of participant data and saves manpower on Race Day

Shared access of participant data on RunSignUp allows both the Timer and you to view information **when** you need it

Consistency of platform across your Timer's races increases their efficiency when working with your race
